# CATEGORY FILE MAINTENANCE

Category codes are used as sort and total options in Inventory item Lookup, Reports and listings. They are OPTIONAL. They group inventory items into smaller or different divisions than the Department. The Category Number is a *four-digit numeric* field.

Here are some examples: Department 1 - Oil Category 1 Drums Category 2 Pails Category 3 Cases

Other suggestions would be by weight or vendor or use type (motor vehicle, machinery, etc.). The Sales Analysis Generator can be run by Category so that you can see sales and profitability by Category. Count Sheets, price lists, reorder reports may all be sorted by Category. Use selection criteria to print only a specific category.

### Menu Select.

From the Master File Maintenance submenu, select - Categories.

# Add Change Delete Categories

Category Report

Quit

## **Add Change Delete Categories**

Name:	3 Q GREASE				
Edit	New	Nexţ	Prev	Delete	Exit
